

Environmental Policy

After due consideration of the local framework, the stakeholders' needs, a detailed risk and opportunities analysis, the Direction produced the following Environmental Policy.

CBS s.r.l. ORAGNIZATION works in the field of advanced composites parts production. Its aim is to offer products which are in compliance with all legal and/or self-imposed prescriptions related to its own environmental aspects.

The importance of the environmental factor is strategic to the company. Improving environmental performances is one of the key point for success evaluation.

As a consequence, all activities performed by any role figure are aimed to:

- Check all processes performed by other role figures.
- People growth and motivation.
- Constant environmental performances improve.
- Environmental protection.
- Pollution prevention.

Environmental Policy is a success key factor to CBS leaders. Therefore, they actively support its development delegating the following responsibilities to the Managership Environmental Representative:

- Identification of flaws in the Environmental Management System and possible preventive or corrective actions.
- Environmental Management System activities plan.
- Constantly update CBS leadership on progresses in the Environmental Policy improvements regarding:
 - Trash disposal optimization and recycle..
 - Direct or indirect energy and resources usage reduction.
 - Objectives and results definition obtained by the application of the environmental policy by all roles inside the company.

The Environmental Management Responsible has the task to define all the operative actions to be taken to accomplish the defined targets and requirements.
